

Roto Fermax Hardware Portfolio

Outward Opening - Inline - Door

Welcome to Roto Ferman

Roto Ferman headquarters in Colombo, Paraná, Brazil.

Today a full subsidiary of the Roto Group the company was established in 1974 under the name "FERMAX" and became a reference for window and door hardware, first in the Brazilian Market and years later in South America. With the acquisition in 2013 by Roto, the company expanded its product development reach into all Latin America and more.

With a comprehensive structure in its manufacturing plant in Colombo, Brazil the unit offers lean manufacturing, state of the art surface finishing and superior delivery services for Latin America and beyond, with established international trade channels to over 20 countries.

Product development focused on mid segment hardware and Emerging Market requirements is core of this unit, and creates value to our customers in need of cost-benefit solutions. This unique setup of lean-flexibility, both in development and production, creates the opportunity for low Capex product launch, small batch sizes and money for value when needs come development and develops products with relatively low investments and batches sizes.

Among the main products you can find single point locks, handles, rollers and many other fittings required for windows and doors in the mid segment. In Roto you find excellence in windows and door hardware. At Roto Ferman you find this same excellence for hardware to the mid segment.

We hope this brochure gives you the idea of what we can do for you and that soon we receive your contact.

Our Structure

- Manufacturing and development Site in Colombo, Brazil
- World class power painting line and processes
- Warehouse with over 4000 positions and more than 7500 SKUs
- Sales and technical support
- Expanded network thru sales and/or warehouse in Roto locations in São Paulo, Buenos Aires, Mexico city and other locations worldwide

1. Information

1.1. General

INFO

All dimensions stated in millimeters. Other values are specified.

The following markings are used in this document.

1.1.1. Material

Symbol	Meaning
Material	
	Timber
	PVC
	Aluminium

1.1.2. Opening types

Symbol	Meaning
Material	
	Inline
	Outward Opening
	Door

1.1.3. Product features

Symbol		Meaning
		Information
		Stay Length
		Opening Angle
		Sash Height
		Sash Width
		Sash Weight
Nº		Material Number
		Description
		Length
		DIN
		Spindle Length

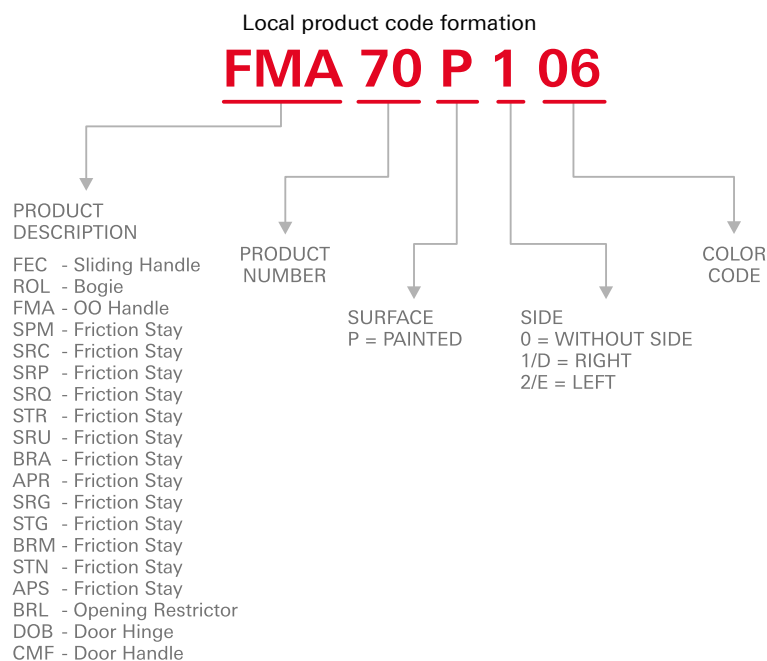

1.1.4. Colours

Colour code	Roto Fermax code	Surface	Colour	RAL number
R01.1	074	Powder coated	Natural silver	9006
R04.1	019	Powder coated	Grey brown	8019
R06.2	022	Powder coated	Jet black	9005
R07.2	061	Powder coated	Traffic white	9016
-	021	Powder coated	White	9003
-	024	Powder coated	Silver Fermax	-
-	070	Powder coated	Black varnish	-
-	068	Powder coated	Chromium	-
-	023	Powder coated	Brown Fermax	8014
-	081	Powder coated	Bronze 1001	-
-	082	Powder coated	Bronze 1002	-
-	083	Powder coated	Bronze 1003	-
-	084	Powder coated	Bronze 1004	-

NOTE: Special colors on request.

1.1.5. Local product code formation

EXAMPLES:

FMA133P121
SPM03P022

NOTE: Standard numeric Roto partnumbers available for some items. Creation upon request.

Outward Opening | Facade

Projecting Systems

SPM-BRF

Their kinematics enables, at the same time, the lower section of the wing to be moved, with the upper section following such movement and being displaced from the frame, thus enabling opening without reversal.

■ Characteristics

Can be applied in facades with box 15 and 17mm;
Meet loads up to 100kg;
Meet all market lines with or without overlap;
Manufactured in duraluminum;
Fully corrosion-resistant;
Fastened with duraluminum rivets which avoid galvanic corrosion;
Best cost-benefit ratio;
Can be anodized or painted;
Can be applied with or without opening limit switch (BRL).

1	Aluminum rivets, protected by polyamide bushings that avoid friction between metal parts.
2	Stainless steel stiffening plate providing greater safety to assembly.
3	Braking device with numeric graduation which enables same braking on both sides.
4	Limit switch to limit opening.
5	Supporting stem without machining, such as bores or diversions thus obtaining greater resistance

Projecting Systems

STN-APS-STG-STR

Their kinematics enables, at the same time, the lower section of the wing to be moved, with the upper section following such movement and being displaced from the frame thus enabling opening without reversal.

■ Characteristics

Can be applied in window frames with box from 11 to 18mm;
Meet loads up to 17kg;
Manufactured in duraluminum;
Fully corrosion-resistant;
Best cost-benefit ratio;
Can be anodized or painted.

1	Aluminum rivets, protected by polyamide bushings that avoid friction between metal parts.
2	Supporting stem without machining, such as bores or diversions thus obtaining greater resistance.

Projecting Sliding Systems SRQ

Their kinematics enables, at the same time, the lower section of the wing to be moved, with the upper section following such movement and being displaced from the frame thus enabling opening without reversal.

■ Characteristics

- Can be applied in window frames with box from 14.5 to 17mm;
- Meet loads up to 34kg;
- Manufactured in duraluminum;
- Fastened with duraluminum rivets which avoid galvanic corrosion;
- Fully corrosion-resistant;
- Best cost-benefit ratio;
- Can be anodized or painted.

1	Aluminum rivets, protected by polyamide bushings that avoid friction between metal parts.
2	System for unlocking and opening for cleaning purposes.
3	Supporting stem without machining, such as bores or diversions thus obtaining greater resistance.
4	Aluminum rivets, protected by polyamide bushings that avoid friction between metal parts.

Progressive Systems SRP-SRC-SRG

The system uses two sliding guides, comprising a pantographic mechanism, which enables projecting the upper section of the wing to the outer side, stabilizing the up and down movements, ensuring wing stability when opened.

■ Characteristics

- Can be applied in facades with box 15 and 17mm;
- Meet loads up to 74kg;
- Meet all market lines without overlap;
- Manufactured in duraluminum;
- Fully corrosion-resistant;
- Fastened with duraluminum rivets which avoid galvanic corrosion;
- Best cost-benefit ratio;
- Can be anodized or painted;
- Can be applied with or without opening limit switch (BRL).

1	Locking pointer prevents wing displacement when closed, providing perfect sealing.
2	Stainless steel stiffening plate providing greater safety to assembly.
3	Braking device with numeric graduation which enables same braking on both sides.
4	Sliding guides that move progressively providing: <ul style="list-style-type: none"> - Wing projection to the outer side; - Secure assembly; - Wing stability when projected; - Stability upon opening and closing movements.
5	Limit switch to limit opening.
6	Supporting stem without machining, such as bores or diversions thus obtaining greater resistance.
7	Aluminum rivets, protected by polyamide bushings that avoid friction between metal parts.

Sliding Systems

BRA-SRU-BRM

Their kinematics enables vertical displacement in parallel to the frame and reversal

■ Characteristics

Can be applied in window frames with box 12 to 13 mm;
Meet loads up to 32kg;
Manufactured in duraluminum;
Fully corrosion-resistant;
Fastened with duraluminum rivets which avoid galvanic corrosion;
Best cost-benefit ratio;
Can be anodized or painted;
Can be applied with or without opening limit switch (BRL).

1	Braking device with numeric graduation which enables same braking on both sides.
2	Aluminum rivets, protected by polyamide bushings that avoid friction between metal parts.
3	Limit switch to limit opening
4	Supporting stem without machining, such as bores or diversions thus obtaining greater resistance.
5	Aluminum rivets, protected by polyamide bushings that avoid friction between metal parts.

SPM
Sliding Friction Stay

■ **Application range**

SW Sash width.....max. 1500mm
 SH Sash height.....320 - 1800 mm
 S.kg Sash weight.....max. 100 kg

NOTE: Only friction stay model suitable for facades with Overlap Glazing System.

→ SW max.1500mm

1 pair of aluminium friction stay (L/R) plus fastening (screws or rivets)

Window Handles Types

Front Handles

Overlap Handles

ATTENTION!
For sashes over one meter wide, it's recommended to use two handles, one right and one left.
There are two installation variants for using the handles on the same sash.
See illustration:

Inline

ROL129N | ROL128N
Inline Rollers

- **ROL129N**
Strong Fit Single Roller - Max. 150kg sash weight
- **ROL128N**
Strong Fit Tandem Roller - Max. 300kg sash weight

Product description

- Adjustable height
- With bearing
- No profile drilling required

■ **Composition**

Structure: aluminum
Guides: synthetic material (nylon)
Bearing: steel
Adjustment screws: stainless steel M6 x 25
Adjustment axis: stainless steel

■ **Fastening**

Fixing screws: stainless steel 4,8 x 16

■ **Packaging**

2 rollers plus fastening/adjustment screws

ROL136 | ROL137
Inline Rollers

■ **ROL136**

Strong Fit Single Roller - Max. 150kg sash weight

■ **ROL137**

Strong Fit Tandem Roller - Max. 300kg sash weight

Product description

- Adjustable height
- With bearing
- No profile drilling required

■ **Composition**

Structure: aluminum
Guides: synthetic material (nylon)
Bearing: steel
Adjustment screws: stainless steel M6 x 25
Adjustment axis: stainless steel

■ **Fastening**

Fixing screws: stainless steel 4,8 x 16

■ **Packaging**

2 rollers plus fastening/adjustment screws

ROL138 | ROL139
Inline Rollers

- **ROL138**
Strong Fit Single Roller - Max. 150kg sash weight
- **ROL139**
Strong Fit Tandem Roller - Max. 300kg sash weight

Product description

- Adjustable height
- With bearing
- No profile drilling required

■ **Composition**

Structure: aluminum
Guides: synthetic material (nylon)
Bearing: steel
Adjustment screws: stainless steel M6 x 25
Adjustment axis: stainless steel

■ **Fastening**

Fixing screws: stainless steel 4,8 x 16

■ **Packaging**

2 rollers plus fastening/adjustment screws

ROL140 | ROL141
Inline Rollers

■ **ROL140**

Strong Fit Single Roller - Max. 150kg sash weight

■ **ROL141**

Strong Fit Tandem Roller - Max. 300kg sash weight

Product description

- Adjustable height
- With bearing
- No profile drilling required

■ **Composition**

Structure: aluminum
Guides: synthetic material (nylon)
Bearing: steel
Adjustment screws: stainless steel M6 x 25
Adjustment axis: stainless steel

■ **Fastening**

Fixing screws: stainless steel 4,8 x 16

■ **Packaging**

2 rollers plus fastening/adjustment screws

ROL142 | ROL143
Inline Rollers

- **ROL142**
Strong Fit Single Roller - Max. 150kg sash weight
- **ROL143**
Strong Fit Tandem Roller - Max. 300kg sash weight

Product description

- Adjustable height
- With bearing
- No profile drilling required

■ **Composition**

Structure: aluminum
Guides: synthetic material (nylon)
Bearing: steel
Adjustment screws: stainless steel M6 x 25
Adjustment axis: stainless steel

■ **Fastening**

Fixing screws: stainless steel 4,8 x 16

■ **Packaging**

2 rollers plus fastening/adjustment screws

ROL144 | ROL145
Inline Rollers

■ **ROL144**

Strong Fit Single Roller - Max. 150kg sash weight

■ **ROL145**

Strong Fit Tandem Roller - Max. 300kg sash weight

Product description

- Adjustable height
- With bearing
- No profile drilling required

■ **Composition**

Structure: aluminum
Guides: synthetic material (nylon)
Bearing: steel
Adjustment screws: stainless steel M6 x 25
Adjustment axis: stainless steel

■ **Fastening**

Fixing screws: stainless steel 4,8 x 16

■ **Packaging**

2 rollers plus fastening/adjustment screws

ROL146 | ROL147
Inline Rollers

- **ROL146**
Strong Fit Single Roller - Max. 150kg sash weight
- **ROL147**
Strong Fit Tandem Roller - Max. 300kg sash weight

Product description

- Adjustable height
- With bearing
- No profile drilling required

■ **Composition**

Structure: aluminum
Guides: synthetic material (nylon)
Bearing: steel
Adjustment screws: stainless steel M6 x 25
Adjustment axis: stainless steel

■ **Fastening**

Fixing screws: stainless steel 4,8 x 16

■ **Packaging**

2 rollers plus fastening/adjustment screws

ROL148 | ROL149
Inline Rollers

- **ROL148**
Strong Fit Single Roller - Max. 150kg sash weight

- **ROL149**
Strong Fit Tandem Roller - Max. 300kg sash weight

Product description

- Adjustable height
- With bearing
- No profile drilling required

■ **Composition**

Structure: aluminum
Guides: synthetic material (nylon)
Bearing: steel
Adjustment screws: stainless steel M6 x 25
Adjustment axis: stainless steel

■ **Fastening**

Fixing screws: stainless steel 4,8 x 16

■ **Packaging**

2 rollers plus fastening/adjustment screws

ROL80N | ROL81N
Inline Rollers

- **ROL80N**
Strong Single Roller - Max. 130kg sash weight
- **ROL81N**
Strong Tandem Roller - Max. 260kg sash weight

Product description

- Adjustable height
- With bearing
- Profile drilling required

- **Composition**
Trestle, wheel support, aluminum base and axles
Wheel w/ nylon- and fiber-coated shielded bearing
- **Fastening**
Stainless screws
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL82N | ROL83N
Inline Rollers

- **ROL82N**
Strong Single Roller - Max. 130kg sash weight
- **ROL83N**
Strong Tandem Roller - Max. 260kg sash weight

Product description

- Adjustable height
- With bearing
- Profile drilling required

- **Composition**
Trestle, wheel support, aluminum base and axles
Wheel w/ nylon- and fiber-coated shielded bearing
- **Fastening**
Stainless screws
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL84N | ROL85N
Inline Rollers

- **ROL84N**
Strong Single Roller - Max. 130kg sash weight
- **ROL85N**
Strong Tandem Roller - Max. 260kg sash weight

Product description

- Adjustable height
- With bearing
- Profile drilling required

- **Composition**
Trestle, wheel support, aluminum base and axles
Wheel w/ nylon- and fiber-coated shielded bearing
- **Fastening**
Stainless screws
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL124N | ROL125N
Inline Rollers

- **ROL124N**
Strong Single Roller - Max. 130kg sash weight
- **ROL125N**
Strong Tandem Roller - Max. 260kg sash weight

Product description

- Adjustable height
- With bearing
- Profile drilling required

- **Composition**
Trestle, wheel support, aluminum base and axles
Wheel w/ nylon- and fiber-coated shielded bearing
- **Fastening**
Stainless screws
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL05 | ROL06
Inline Rollers

- **ROL05**
Single Roller without bearing - Max. 15kg sash weight
- **ROL06**
Single Roller with bearing - Max. 40kg sash weight

Product description

- Fixed height

- **ROL05**
- **Composition**
Nylon wheel, trestle
Aluminum wheel axle
- **Packaging**
100 rollers

- **ROL06**
- **Composition**
Nylon wheel, trestle
Steel/nylon bearing
- **Packaging**
100 rollers

ROL10

Inline Rollers

- **ROL10**
Single Roller - Max. 15kg sash weight

Product description

- Fixed height
- Without bearing

- **Composition**
Aluminum trestle/wheel support/wheel axle
Polyacetal wheel
Nylon bolt brake
- **Fastening**
Carbon M6 x 20 bolt
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL13
Inline Rollers

- **ROL13**
Single Roller - Max. 40kg sash weight

Product description

- Fixed height
- With bearing

- **Composition**
Nylon trestle
Steel/nylon bearing
- **Packaging**
2 rollers

ROL17
Inline Rollers

- **ROL17**
Single Roller - Max. 70kg sash weight

Product description

- Fixed height
- With bearing

- **Composition**
Nylon trestle
Steel/nylon bearing
- **Packaging**
2 rollers

ROL17V | ROL19V
Inline Rollers

- **ROL17V | ROL19V**
Single Roller - Max. 70kg sash weight

Product description

- Fixed height
- With bearing

- **Composition**
Aluminum trestle and axle
Nylon wheel
Steel bearing

- **Packaging**
2 rollers

ROL37N | ROL38N Inline Rollers

■ ROL37N

Single Roller with bearing - Max. 40kg sash weight

■ ROL38N

Single Roller without bearing - Max. 15kg sash weight

Product description

- Adjustable height

■ Composition

Nylon and fiber trestle/ wheel support
Wheels w/ nylon/bichromated steel bearing

■ Fastening

Stainless 3.9 x 13 screws
Stainless M5 x 20 bolts

■ Packaging

2 rollers plus fastening/adjustment screws

ROL53
Inline Rollers

- **ROL53**
Single Roller - Max. 100kg sash weight

Product description

- Adjustable height
- With bearing

- **Composition**
Aluminum trestle/ wheel support/wheel axle
Polyacetal wheel
Nylon bolt brake
Shielded bearing
- **Fastening**
Carbon M6 x 20 bolt
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL55 | ROL56 Inline Rollers

- **ROL55**
Single Roller without bearing - Max. 15kg sash weight
- **ROL56**
Single Roller with bearing - Max. 30kg sash weight

Product description

- Fixed height

- **ROL55**
- **Composition**
Nylon trestle/ wheel
- **Fastening**
Stainless Bolt
- **Packaging**
100 rollers plus fastening/adjustment screws

- **ROL56**
- **Composition**
Nylon trestle/ wheel
Steel bearing
- **Fastening**
Stainless 3.9 x 9.5 bolt
- **Packaging**
100 rollers plus fastening/adjustment screws

ROL57N | ROL58N
Inline Rollers

- **ROL57N**
Single Roller without bearing - Max. 15kg sash weight
- **ROL58N**
Single Roller with bearing - Max. 30kg sash weight

Product description

- Adjustable height

- **Composition**
Nylon trestle, wheel support, wheel
Aluminum wheel axle
- **Fastening**
Stainless 3.9 x 13 screws
Stainless M5 x 20 bolts
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL59
Inline Rollers

- **ROL59**
Single Roller - Max. 40kg sash weight

Product description

- Adjustable height
- With bearing

■ **Composition**

Nylon trestle
Nylon wheel
Zamak wheel
Steel bearing

■ **Fastening**

Stainless 3.9 x 9.5 cm screws
Stainless M5 x 20 bolts

■ **Packaging**

2 rollers plus fastening/adjustment screws

ROL61 | ROL62
Inline Rollers

- **ROL61**
Single Roller without bearing - Max. 15kg sash weight

- **ROL62**
Single Roller with bearing - Max. 30kg sash weight

Product description

- Adjustable height

- **ROL61**
- **Composition**
Nylon trestle/wheel
Zamak wheel support
Aluminium axle
- **Fastening**
Stainless 3.9 x 9.5 cm screws
Stainless M5 x 20 bolts
- **Packaging**
10 rollers plus fastening/adjustment screws

- **ROL62**
- **Composition**
Nylon trestle/wheel
Zamak wheel support
Steel bearing
- **Fastening**
Stainless 3.9 x 9.5 cm screws
Stainless M5 x 20 bolts
- **Packaging**
10 rollers plus fastening/adjustment screws

ROL70

Inline Rollers

- **ROL70**
Single Roller - Max. 100kg sash weight

Product description

- Fixed height
- With bearing

- **Composition**
Aluminum trestle and axle
Wheel with shielded bearing
- **Packaging**
2 rollers

ROL71N
Inline Rollers

- **ROL71N**
Single Roller - Max. 40kg sash weight

Product description

- Adjustable height
- With bearing

- **Composition**
Nylon and fiber trestle/ wheel support
Steel/ nylon bearing
- **Fastening**
Stainless 3.9 x 13 screws
Stainless M5 x 20 bolts
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL100N
Inline Rollers

- **ROL100N**
Single Roller - Max. 100kg sash weight

Product description

- Fixed height
- With bearing

- **Composition**
Aluminum trestle and axle
Wheel w/ shielded bearing
Finish: polished

- **Packaging**
2 rollers

ROL39N
Inline Rollers

- **ROL39N**
Tandem Roller - Max. 80kg sash weight

Product description

- Adjustable height
- With bearing

- **Composition**
Nylon and fiber trestle/ wheel support
Wheels w/ nylon/bichromated steel bearing
- **Fastening**
Stainless M5 x 20 screws
Stainless 3.9 x 13 bolts
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL40N Inline Rollers

- **ROL40N**
Tandem Roller - Max. 80kg sash weight

Product description

- Adjustable height
- With bearing

- **Composition**
Nylon trestle/ wheel support
Steel/ nylon bearing
- **Fastening**
Stainless M5 x 20 screws
Stainless 3.9 x 13 bolts
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL78
Inline Rollers

- **ROL78**
Tandem Roller - Max. 60kg sash weight

Product description

- Adjustable height
- With bearing

- **Composition**
Aluminum trestle, wheel support
Nylon wheel
Steel bearing
- **Fastening**
Galvanized Steel M6 x 20 screws
Stainless 3.9 x 13 bolts
- **Packaging**
2 rollers plus fastening/adjustment screws

ROL99

Inline Rollers

■ ROL99

Tandem Roller - Max. 60kg sash weight

Product description

- Adjustable height
- With bearing

■ Composition

Aluminum trestle and wheel support
Nylon/steel wheel
Nylon sliding block, brake

■ Fastening

Galvanized Steel M6 x 20 screws
Stainless 3.9 x 13 bolts

■ Packaging

2 rollers plus fastening/adjustment screws

ROL102
Inline Rollers

- **ROL102**
Tandem Roller - Max. 60kg sash weight

Product description

- Adjustable height
- With bearing

■ **Composition**

Nylon trestle, bolt guide
Aluminum wheel support
Nylon/steel wheel

■ **Fastening**

Stainless M5 x 25 screws
Stainless 3.9 x 19 bolts

■ **Packaging**

2 rollers plus fastening/adjustment screws

FEC121N | FEC122N
Inline Handles

- **FEC121N**
DUO Standard single-point pull handle
- **FEC122N**
DUO Lockable single-point pull handle

Product description

- Length: 192mm
- Automatic function
- Standard locking system - hooks
- Invisible screws fixing

- **FEC121N**
- **Composition**
Aluminum base and bracket
Latch, stainless steel spring
Polyacetal stop pin
- **Fastening**
Stainless M5 x 6 bolts
- **Packaging**
1 handle set plus fastening screws

- **FEC122N**
- **Composition**
Aluminum base and bracket
Latch, stainless steel spring
Steel lock cylinder and spring
Lock support, polyacetal stop pin
- **Fastening**
Stainless M5 x 6 bolts
- **Packaging**
1 handle set plus fastening screws

CON11N
Inline Handles

■ **CON11N**
DUO - Finger pull handle

Product description

- Length: 192mm
- Invisible screws fixing

- **Composition**
Aluminum base and bracket
Stainless steel latch

- **Packaging**
1 handle

FEC129 | FEC129S Inline Handles

- **FEC129**
Easy Touch - Standard single-point pull handle
- **FEC129S**
Easy Touch - Standard single-point pull handle

Product description

- One-touch function
- Length: 160mm
- Horizontal locking
- Exterior visible/invisible screw-fixing
- Standard locking system - hooks

■ FEC129

■ FEC129S

- **FEC129**
- **Composition**
Aluminium base
Steel spring
Polyacetal stop pin
- **Fastening**
Stainless 4.2 x 8 screws
Stainless M6 x 6 bolts
- **Packaging**
1 handle set plus fastening screws

- **FEC129S**
- **Composition**
Aluminium base
Steel spring
Polyacetal stop pin
- **Fastening**
Stainless M6 x 6 bolts
- **Packaging**
1 handle set plus fastening screws

FEC131 | FEC132 | FEC133
Inline Handles

- **FEC131**
Easy Touch - Standard single-point pull handle
- **FEC132**
Easy Touch - Lockable single-point pull handle
- **FEC133**
Easy Touch - Push button single-point pull handle

Product description

- One-touch function
- Length: 192mm
- Horizontal locking
- Exterior visible screw-fixing
- Standard locking system - hooks

■ **FEC131 | FEC132**

■ **FEC133**

- **FEC131**
- **Composition**
Aluminium base
Steel spring
Zamak lock cylinder
Support, nylon lock latch
- **Fastening**
Stainless 4.2 x 8 screws
- **Packaging**
1 handle set plus fastening screws

- **FEC132**
- **Composition**
Aluminium base
Steel spring
Nickel-plated zamak clamp
Aluminium latch
- **Fastening**
Stainless Bolts
- **Packaging**
1 handle set plus fastening screws

- **FEC133**
- **Composition**
Aluminium base
Steel spring
Nylon activator button and support
Polyacetal stop pin
- **Fastening**
Stainless 4.2 x 8 screws
Stainless 3.9 x 16 bolts
- **Packaging**
1 handle set plus fastening screws

BAC01 | BAC02 | BAC03

 Nylon framework

■ **Packaging**
 1 button

CON09 | CON09S
Inline Handles

- **CON09**
Easy Touch Finger Pull Handle - exterior visible screw-fixing
- **CON09S**
Easy Touch Finger Pull Handle - exterior invisible screw-fixing

Product description

- Length: 160mm

■ **CON09**

■ **CON09S**

- **CON09**
- **Composition**
Aluminum base and bracket
- **Fastening**
Stainless 4.2 x 8 screws
- **Packaging**
1 handle set plus fastening screws

- **CON09S**
- **Composition**
Aluminum base and bracket
Nylon latch
- **Packaging**
1 handle

CON13
Inline Handles

■ **CON13**
Easy Touch Finger Pull Handle

Product description

- Length: 192mm
- Exterior visible screw-fixing

- **Composition**
Aluminum base and bracket
- **Fastening**
Stainless 4.2 x 8 screws
- **Packaging**
1 handle set plus fastening screws

FEC93 | FEC94
Inline Handles

- **FEC93**
Standard single-point pull handle
- **FEC94**
Lockable single-point pull handle

Product description

- Length: 160mm
- Manual function
- Exterior visible screw-fixing
- Standard locking system - hooks

- **FEC93**
- **Composition**
Aluminum base and bracket
- **Fastening**
Stainless 4.2 x 8 screws
Stainless M5 x 6 bolts
- **Packaging**
1 handle set plus fastening screws

- **FEC94**
- **Composition**
Aluminum base and bracket
Brass key
- **Fastening**
Stainless steel lock panel
Stainless 4.2 x 8 screws
Stainless M5 x 6 bolt
- **Packaging**
1 handle set plus fastening screws

FEC16S | FEC19S
Inline Handles

- **FEC16S**
Standard single-point pull handle
- **FEC19S**
Lockable single-point pull handle

Product description

- Length: 160mm
- Manual function
- Exterior invisible screw-fixing
- Standard locking system - hooks

- **Composition**
Structure and handle: aluminium
Trims: polyamide 6.6
- **Fastening**
Stainless steel screws M6 x 6 + 4,2 x 8
- **Packaging**
1 handle set plus fastening screws

FEC125 | FEC126
Inline Handles

- **FEC125**
Standard single-point pull handle
- **FEC126**
Lockable single-point pull handle

Product description

- Length: 160mm
- Automatic function
- Exterior visible screw-fixing
- Standard locking system - hooks

■ **Composition**

Structure and handle: aluminium
Trims: polyamide 6.6

■ **Fastening**

Stainless steel screws M6 x 6 + 4,2 x 8

■ **Packaging**

1 handle set plus fastening screws

FEC37S | FEC38S
Inline Handles

- **FEC37S**
Standard single-point pull handle
- **FEC38S**
Lockable single-point pull handle

Product description

- Length: 160mm
- Automatic function
- Exterior invisible screw-fixing
- Standard locking system - hooks

- **Composition**
Structure and handle: aluminium
Trims: polyamide 6.6
- **Fastening**
Stainless steel screws M6 x 6 + 4,2 x 8
